PROJECTS

DeveloperOS AI – Full Stack Learning Management Platform [🔗](#)

[Github Link](#)

- Built a full-stack AI-powered learning platform using React 19, TypeScript, Node.js, Express 5, Prisma 7, and PostgreSQL with JWT auth, spaced repetition, and Google Gemini AI integration.
- Architected a production-grade REST API with Express 5 – Controller 'Service pattern, Zod validation, centralized error handling, CORS whitelist, and role-based route protection.
- Integrated Google Gemini AI for generating topic explanations and code examples with optimistic UI updates via React Query for instant user feedback.

Freelancer Manager Platform [🔗](#)

[Github Link](#)

- Built a full-stack freelancer dashboard with Next.js App Router and MongoDB where users can track clients, projects, and tasks from a single interface.
- Implemented NextAuth for secure authentication, SWR for client-side data caching, and Formik + Yup for form validation – mimicking real-world production app patterns.

Full Stack Blog Platform

[Github Link](#)

- Built a production-grade blog app with Next.js frontend and Express.js + PostgreSQL backend using Drizzle ORM – full DB schema to UI integration.
- Implemented JWT authentication, protected middleware, admin-only delete gate, and full CRUD for blog posts with request validation.
